

## **Kangaroo Carry A favorite of many babies!**

**3 months - 9 months**

This hold is great once baby has better head control. It allows them to still be snuggled against you while peeking out.

**See below pictures for help:**

**1. Hold baby with his back towards you**

**2. Pull his feet bottoms together and knees out, like a little yoga man**

**3. Open the pouch**

**4. Begin to lower him bottom first into the sling**

**5. Adjust the fabric to be sure he is supported & that his legs are comfortably crossed in front of him!**

**6. Adjust and go!**
